Preliminary Info About This Demo

- Comments/Notes about using the app are in red
and are only meant for this demo and will not be present
in the final build

- Drag movements are on a path and guided automatically.
You do not have full control of the elements.
This serves to demonstrate a user playing the game

- Look for the cursor for interactive elements
or when to:

Click anywhere to proceed

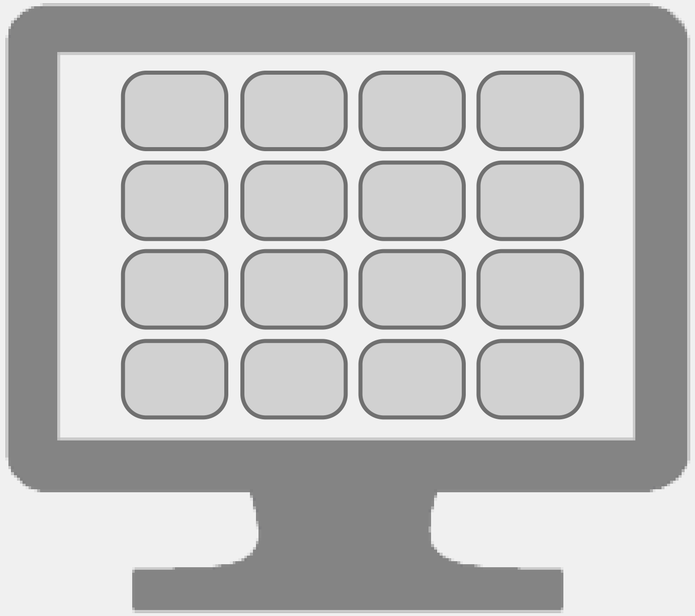
Virtualize THIS!

Instructions

- Phases 1-3: Drag and drop the tiles to their correct locations on the game board

- Final Phase: Uncover 4 matches in a row for each category

START



Demonstrating what it will look like when the user guesses incorrectly

Phase 1

Mismatches

X X X

Virtual Machine	
Management Utility	
Hypervisor	
Physical Server	

A simulated computer system, with its own OS, that runs on a physical computer

Software that allocates hardware resources to create and run VMs

A piece of hardware that provides the necessary resources to run devices or applications, called “clients”

Main dashboard for deploying and managing VMs remotely

Demonstrating what it will look like when the user guesses incorrectly
